BCG Growth-Share Matrix Definition

The BCG matrix is a two-by-two matrix that classifies businesses, divisions or products according to the present market share and the future growth of that market. Growth is seen as the best measure of market attractiveness. Market share is seen to be a good indicator of competitive strength

BCG growth share matrix

BCG matrix is a framework created by Boston Consulting Group to evaluate the strategic position of the business brand portfolio and its potential. It classifies business portfolio into four categories based on industry attractiveness (growth rate of that industry) and competitive position (relative market share). These two dimensions reveal likely profitability of the business portfolio in terms of cash needed to support that unit and cash generated by it.

BCG growth-share matrix - Strategic Management Insight

The growth-share matrix is a chart that was created by Bruce D. Henderson for the Boston Consulting Group in 1970 to help corporations to analyze their business units, that is, their product lines. This helps the company allocate resources and is used as an analytical tool in brand marketing, product management, strategic management, and portfolio analysis. Some analysis of market performance by firms using its principles has called its usefulness into question.

Growth-share matrix - Wikipedia

Using the Boston Consulting Group (BCG) approach, a company classifies all its SBUs according to the growth-share matrix. On the vertical axis, the market growth rate provides a measure of market attractiveness. On the horizontal axis, relative market share serves as a measure of company strength in the market.
