Visual Basic 2008 allows a procedure to be repeated as many times as long as the processor and memorycould support. This is generally called looping . Looping is required when we need to process something repetitively until a certain condition is met.

using loop in writing visual basic 2008 program code

Visual Basic (VB) is a programming language developed by Microsoft for their operating system Windows.The BASIC language is said to be easier to read than other languages.. Visual Basic is a widely understood high-level programming language, written using simple English-like words and syntax.It is an interpreted language, code can be run immediately after being written.

Visual Basic - Simple English Wikipedia, the free encyclopedia

Visual Basic 2008 is very much similar to Visual Basic 6 in terms of syntaxes and program structure, but their underlying concepts are very different. The main difference is that VB2008 is an object-oriented Programming Language under the .NET framework. Although VB6 may have some OOP capabilities, it is not an object-oriented programming language.
