Before talking about the aerodynamics of helicopters we first have to introduce a few basic principles of aerodynamics. In order to get aircrafts that are "heavier than air" off the ground a force has to act upwards that is at least equal to the weight of the aircraft. This force is called lift and is created by the wings.

Because of my job position, I felt that it was necessary for me to understand the basic fundamentals of helicopter aerodynamics. I ordered this textbook and I considered it to be by far the very best textbook on the subject of helicopter aerodynamics. It has problems to solve at the end of each chapter which is great but that is one of the drawbacks.
