counterparty risk. Gold can also be shown to protect against events that are not necessarily frequent (or likely) but which, when they occur, can substantially erode the capital of an investor’s portfolio in unexpected ways. These events are typically referred to as tail risk, as they produce observed returns that fall in the “tail” of a distribution. In this study

Gold: hedging against tail risk

Investors who do not hold gold or view it purely as a temporary safe haven asset are failing to harness its full potential to protect wealth. This report shows that gold does not only help to increase expected risk-adjusted returns in a portfolio but can also significantly mitigate the potential for wealth to be eroded by extreme events, as evidenced by statistical analysis of tail risk scenarios.
