Reprogramming the Cerebral ...

Neuroplasticity, also known as neural plasticity, or brain plasticity, is the ability of neural networks in the brain to change through growth and reorganization. These changes range from individual neurons making new connections, to

systematic adjustments like cortical remapping. Examples of neuroplasticity include circuit and network changes that result from learning a new ability ...

Neuroplasticity - Wikipedia

We still do not know whether neurons of the adult cerebral cortex (and for that matter from any region of the mammalian CNS) can be directly reprogrammed from one class into another. However, recent evidence demonstrates that differentiated projection neurons are more plastic than previously thought.
