Smart Moves Why Learning Is

This is possibly the most inspiring book on learning and education that I have read. If you have any interest in learning, education, the brain, or in child development then Smart Moves is a must-read. 7 Kinds of Smart: Identifying and Developing Your Multiple Intelligences

Smart Moves: Why Learning Is Not All in Your Head: Amazon ...

In Smart Moves Carla Hannaford describes how the prevailing education system is failing our children and ultimately our society. The author shows how a "left brain" oriented education system not only devalues such gestalt attributes as creativity and emotional expression but results in failure for many to reach their potential - not just academically, but in their full expression as human beings.

Amazon.co.uk:Customer reviews: Smart Moves: Why Learning ...

The book Smart Moves: Why Learning Is Not All In Your Head was written in 1995 by neurophysiologist and educator Carla Hannaford (revised and enlarged second edition published 2005), and includes an introduction by neuroscientist Candace Pert . In Smart Moves, Hannaford looks at the body's role in thinking and learning, citing research from child development, physiology, and neuroscience.

Smart Moves - Wikipedia

Hannaford explains that learning requires movement because the learning process is not fully complete until thoughts are connected to a physical, personal action (like speaking, writing or drawing) that can express the new knowledge. “Learning is not all in your head. The active, muscular expression of learning is an important ingredient” (p 99).

Carla Hannaford’s Smart Moves: Why Learning is Not all in ...

Smart Moves ~ Why Learning Is Not All In Your Head by Carla Hannaford PhD. Deeply rooted in our culture is the notion that intellectual activity can somehow exist apart from our bodies, as if our body’s role is simply to carry the brain from place to place so it can do the important work of thinking. Dr Carla Hannaford, a university lecturer in neurophysiology, sets out to explore this myth.

Smart Moves ~ Why Learning Is Not All In Your Head | Brain ...

The book sets out a programme of advice on raising children so that their learning systems don't have to operate under this stress impairment - no TV until age 8 is probably the most radical (TV moves too fast for the developing child’s brain to take in, plus, as is well documented, it features

thousands of acts of violence which affects the child's mindset and physiology).
