Eating The Sun How Plants

Eating the Sun is the story of a world in crisis; an appreciation of the importance of plants; a history of the earth and the feuds and fantasies of warring scientists; a celebration of how the smallest things, enzymes and pigments, influence the largest things, the oceans, the rainforests, and the fossil fuel economy. Oliver Morton offers a fascinating, lively, profound look at nature's greatest miracle and sounds a much-needed call to arms—illuminating a potential crisis of climatic ...

Eating the Sun is a model of science writing for the nonscientist and an exemplary chapter in the history of science, written with integrative intelligence, leavened with deft, humorous biographical characterizations, and punctuated by a series of concluding statements of startling, poetic power.

Eating the Sun: How Plants Power the Planet by Oliver ...

Eating the Sun is not just a random title picked by a publisher--it captures how perspective is driven by starting with the 6000K sun and describing how plants make use of all that heat and light. So there's a lot about photosynthesis and metabolism, rather less in details about leaf shape, flowers, insects or seeds.
