The JCR was a joint effort between industry and authorities in both Norway and Denmark in order to promote development of the hydrocarbon resources stored in chalk formations. In a way, the JCR was thus the predecessor to the FORCE Carbonate and Chalk Reservoirs network, which was formed in late 2018. One aim of the Carbonate and Chalk Reservoirs network group is to promote and further develop the findings from the JCR and facilitate for continued advancements for a sustainable development ...

Abstract. Carbonate oil reservoirs are sometimes regarded with apprehension in the petroleum industry since it can be difficult to predict the quality of, and ensure high recovery factors from, this rock family. Particular problems are the complex and heterogeneous nature of porosity in carbonate rocks, often leading to large ranges in permeability for any given porosity, and the organization of carbonate successions most commonly as vertically heterogeneous, but laterally persistent, layers.

Introduction. The 2006 discovery at Tupi, offshore Brazil, opened up a new chapter for petroleum reservoirs: lacustrine carbonates capable of producing hydrocarbons at extremely high rates. Several recent studies have started to unravel the mystery of these poorly understood and highly varied reservoirs; however, many questions remain.

Recognising this diversity is not only a key aspect of locating carbonate reservoirs during exploration, but also of carbonate reservoir description. This understanding, sometimes guided by outcrop studies, ultimately allows the construction of realistic static reservoir frameworks populated with facies and rock types, which leads in turn to the optimal placement of development wells.

Carbonate reservoir. A significant proportion of the world's oil reserves are found in carbonate reservoirs. Many of these are located in the Middle East, Libya, Russia, Kazakhstan, and North America. Some very large oil fields have carbonate reservoirs, including the largest conventional oil field in the world, the Ghawar field of Saudi Arabia. The reason for the very large size of some carbonate reservoirs is not surprising when one considers the sheer scale of even modern-day carbonate ...
