ecology, neurobiology, and evolutionary biology. An enormous amount of relevant new research has been published since the first edition of *Principles of Animal Communication*, and over 90% of the citations in this new edition were published since the first edition appeared.

Principles of Animal Communication by Jack W. Bradbury

Animal communication is the transfer of information from one or a group of animals (sender or senders) to one or more other animals (receiver or receivers) that affects the current or future behavior of the receivers. Information may be sent intentionally, as in a courtship display, or unintentionally, as in the transfer of scent from predator to prey.
