The system reactivates automatically each time the vehicle is started using the start button (please refer to "Starting, stopping the engine" in Section 2). Operating faults When the message "Check Stop & Start" appears on the instrument panel and the integrated warning light 2 lights up on the switch 1, the system is deactivated.

FUNCTION STOP AND START - Renault

What it means: If your car is running on diesel, this is the glow plug indicator. Due to the nature of diesel engines, they require some extra help when first starting up at a cold temperature. The glow plug is a heating element that is activated during startup when the temperature of the engine is too low.

Starting, Lighting, Ignition (SLI) - Starter Batteries These batteries deliver a large burst of power for a short time as needed for normal engine starting. The battery is then recharged by the

alternator.

Deep-Cycle vs. Starting Batteries - Your Auto Battery ...

Leave the battery disconnected for 10 minutes to ensure that the computer is fully reset. Step 5 Reconnect the negative battery cable to the terminal and tighten the nut that holds it in place. Close the vehicle's hood and start your car to check that the computer has reset and that the warning lights have disappeared.

How to Reset the Warning Lights on the Dash | It Still Runs

A typical electrical system Apart from the main charging, starting and ignition circuits, there are other circuits that power lights,

electric motors, the sensors and gauges of electrical instruments, heating elements, magnetically operated locks, the radio and so on.

How car electrical systems work | How a Car Works

The other most common reason you would have a car slow to start is that your car has a weak battery and it's in need of replacement. The battery in your vehicle uses a chemical reaction between lead and sulfuric acid to create the electricity used to start your vehicle and to power the lights and accessories when your vehicle is not running.

Start with the Dome
Light or Dimmer Switch
. When your car
interior lights stop
working, the best place
to start is also the
easiest fix. The most
common cause of this
problem is when
someone other than
the driver uses the
dome light or dimmer

switch. This can leave
the interior lights in a
state where they no
longer come on when
you open the door.

Car Interior Lights Not Working? Try These Four Solutions

A Le Mans-style start
was used for many
years in various types
of motor racing. When
the start flag dropped,
drivers had to run
across the track to
their cars which were
parked on the other
side, climb in, start the
car, and drive away to
begin the race.
