Sausage Formulation Spreadsheet
Processors who make small batches of sausage for independent meat producers often use commercial, pre-blended mixes. Mixing a producer's own specialty sausage recipe is time consuming and can be a logistical headache: processors must keep unique ingredients separated and communicate

numerous different recipes to staff with individual batch calculations, increasing the chance of error.

The meat for a sausage should contain about

25 - 30% fat in it. This will make the sausage tender and juicy, without fat it will feel dry. This is not such a big amount as it might seem so at first. Fresh sausages made in the USA can legally contain 50% fat and this is what you get in a supermarket.
