Regulating a piano (2) evens out the "touch response" of every key across the keyboard, and (3) adjusts the speed of repetition. Action regulation (4) maximizes the power and control of each note within the piano, allowing each pianist the freedom of individual musical dynamic expression, and control of the piano's keyboard. (5) The keyboard's height and (6) the level of depth each key is depressed, is adjusted, allowing for the optimal touch response, and preference, of each pianist (e.g.
