Review also published here The Master of Mankind is up there with some of the best books in the Horus Heresy series. I have no doubt about that at the very least. It is a product of mountains of passionate work and hits all the right spots for presenting the Emperor to the reader, even if not a single scene is shown through his eyes.

Dembski-Bowden has written the most difficult book of the Horus Heresy. 'Master' is an engaging insight into one of the most mysterious characters in 40K. Because it is based on a wargame, the book contains a number of scenes in which psychotic warriors on all sides engage in total conflict.
