...

Human growth and development theory is concerned with understanding how people grow and change throughout their lives, from the vital early stages to old age, and therefore is essential for informing social work practice. The theory can be applied to a variety of areas within human life and conduct including social, cultural, emotional and psychological, and also, moral, intellectual, spiritual and biological viewpoints.

Human Growth And Development Analysis - UKEssays.com

Grand and specific

theories are concerned with human movement and growth. Although not directly addressed in most theories, a hierarchy from least to most desirable—whether expressed as immature to mature, limited to fully developed, and so forth—is implicit in developmental theories.

Overview of Developmental Theories

These theories are often rooted in the ideas established by grand theories, but they do not seek to describe and explain the whole of human behavior and growth.

5. TYPES OF THEORIES

Emergent Theories

Emergent theories are those that have been created fairly recently and are often formed

by systematically combining various minitheories.

Theories of human development - SlideShare

According to the Psychoanalytic theory developed by Sigmund Freud (1856-1939), human development and growth is always driven by motives and emotions that people hold and which people are mostly unaware of those motives and emotions. The theory explains that the earlier experience that an individual had helps in shaping the life of that particular individual.
