Orthodontic Retainers and Removable Appliances: Principles ...

Simple treatment may be carried out with a removable appliance (a plate that can be taken out to be cleaned). Removable braces have delicate wires and springs attached, which move the teeth using gentle pressure.

Removable Appliances - The Orthodontic Clinic

Removable appliances Removable appliances (braces) include removable

aligners and functional appliances as well as simple conventional types.

British Orthodontic Society > BOS Homepage > Orthodontics ...

The Retainers. This is one of the most important parts of orthodontic treatment. It makes your progress permanent and, in most cases, requires a little discipline. Whether you receive a bonded retainer that's attached to your teeth, a traditional removable retainer, or clear aligners, it's important to care for your appliance and maintain the results you've worked for over the course of your treatment.

Removable Orthodontic Appliances | Stroope Orthodontics

After the active orthodontic treatment

period is complete and your braces have been removed, you will be given a retainer. A retainer is used to hold teeth in their new positions while the jawbone, gums and muscles adapt it's very important to know that without retainers teeth could move.

Types Of Orthodontic Removable Retainers | Broadlands ...

Retainers are used at the end of a course of orthodontic treatment. They hold straightened teeth in place while the surrounding gum and bone adjusts to their new position. Retainers can either be removable or fixed. Under the NHS, your orthodontist is responsible for your care for 12 months after usual treatment ends.

Orthodontics - Orthodontic treatments - NHS

Retainers are fitted at the end of orthodontic treatment after the braces are removed. They can be either removable or fixed onto the teeth. There are different types of retainers. The choice of retainer is affected by a number of different factors and your orthodontist will explain which retainer is best for you.

Retainers - British Orthodontic Society > BOS Homepage

That the appliance is for the patient. The design is the one requested. The appliance fits the working model. The appliance has no sharp or rough surfaces, edges etc. Fit the appliance to the patient and check; It fits properly.

The base plate fits closely. The retention (Adams clasps) fit correctly. It is not producing any discomfort.
