Language Processing In Atypical Populations

This paper is intended to provide a critical overview of experimental and clinical research documenting problems in figurative language processing in atypical populations with a focus on the Autistic Spectrum. Research in the comprehension and processing of figurative language in autism invariably documents problems in this area.

Figurative language processing in atypical populations ...
 Overview. This up-to-date presentation of language use and

communication skills in atypical populations addresses questions on the essence of language, how it is shaped by normal cognitive, perceptual and social constraints and how it can be rehabilitated when these constraints are abnormal. The author covers: the evolutionary continuity of language as seen in communication systems in other species; the structure, power and processing of signed languages compared with spoken language; effect ...

Language deprivation is associated with the lack of linguistic stimuli that are necessary for the language acquisition processes in an individual. Research has shown that early exposure to a first language will predict future language outcomes. Experiments involving language deprivation are very scarce due to the ethical controversy associated with it.

Language deprivation - Wikipedia

This book examines the available data from these "atypical" aphasics, asking whether what makes them different has a significant effect on language representation and processing in the brain. Each chapter reviews literature pertinent to a given population and explores whether (and potentially how) these

populations differ from the "typical" aphasic population.

Aphasia in Atypical Populations on Apple Books

implicit processing of pain semantics in neurotypical and chronic pain populations, and how linguistic context may modulate pain perception. The aim of our study was to test the influence of language comprehension on pain perception, in the context of semantic models based on mental simulation (Barsalou, Santos, Simmons, & Wilson, 2008).

When words burn - language processing differentially ...

Successful language processing requires speaker and hearer to dynamically create richly structured representations within a few hundred milliseconds of encountering each new word. ... and its work involving neuro-computational modeling of language processing and studies of developmental and atypical populations.

Psycholinguistics | Department of Linguistics

In the current paper, we propose that atypical rhythm might be one of the underlying risk factors that has common biological underpinnings with, and may lead to, co-morbid impairments in speech/language processing.
