Kevin Shillington The study of African history came of age in the 1960s, coinciding with the emergence of many newly-independent modern African states. Professional historians working in the universities and archives of Africa, Europe and north America have over the past thirty years, produced millions of

words and hundreds of volumes on various aspects of the history of Africa.

History of Africa | Kevin Shillington | download

Shillington's "History of Africa" serves its purpose; namely, an introduction and historical survey of the history of Africa from ancient to modern time. The historical accuracy of the text - especially concerning the time before the bronze age - is seriously dubious, and moot at best.

Shillington
acknowledges
humanity's African
origins, but considers
the early folks were
probably brown (not
the de rigueur black);
that ironworking was
probably introduced
via the Maghrib (rather
than diffusing from
black Meroe);
considers Napata and
Meroe to have been
civilized from Egypt
(rather than the other
way around); and does

not insist that the
ancient Egyptians were
all dark Africoids.
