Behavioral Ecology. In animal conflicts, such as territory or food source defense, the success of one animal's chosen strategy depends on the strategies of

the other individuals involved. Because of this, animal conflicts can be modeled after simple games, such as "Rock, Paper, Scissors," in which the outcome of the game depends on which strategies each player chooses.

Behavioral Ecology: Game Theory | SparkNotes

While game theory originally addressed zero-sum games wherein the loss of one resulted in the gain of another, it now has wide-ranging applications for animal behavior. The concepts of game theory that are so fundamental to modern animal behavior science include conditional costs and benefits (my costs and benefits of being social are relative to your costs and benefits of being social), rules of thumb, and iterated

versus non-iterated interactions, which are directly applicable to practical ...

Evolutionary game theory (EGT) is the application of game theory to evolving populations in biology. It defines a framework of contests, strategies, and analytics into which Darwinian competition can be modelled. It originated in 1973 with John Maynard Smith and George R. Price's formalisation of contests, analysed as strategies, and the mathematical criteria that can be used to predict the ...

Evolutionary game theory - Wikipedia

Game theory is the study of

mathematical models of strategic interaction among rational decision-makers. It has applications in all fields of social science, as well as in logic, systems science and computer science. Originally, it addressed zero-sum games, in which each participant's gains or losses are exactly balanced by those of the other participants.

Game theory - Wikipedia

Another thing that I want to point out about evolutionary game theory is that it can actually help us predict the traits we would expect to see in populations. Evolutionary game theory predicts the appearance of evolutionary stable strategies, or behaviors that tend to persist within a population once they are prevalent. So let's think about this in

terms of a complex behavior like altruism. So imagine that we have two groups of monkeys.
