Local Economic Development Analysis And Practice

Local Economic Development is an approach to economic development, of note in the developing world that, as its name implies, places importance on

activities in and by cities, districts and regions. This involves added micro-economic measures at the local level to complement macro-economic measures at the national level. LED encompasses a range of disciplines including physical planning, economics and marketing, all with the goal of building up the economic capacity of a local area to improve it

Local economic development - Wikipedia

Local Economic Development (LED)
Recent economic crises have revealed and often widened inequalities within countries. With the weakening of traditional sources and patterns of work and the expansion of the

informal economy, bottom-up interventions responding to local needs emerge as key strategies to create decent jobs where they are most needed.

Local Economic Development (LED) (ENTERPRISES)

lessons from economic theory which underpins these policy changes. The scope of this paper is to set out broad analysis on economic drivers and disparities between places. We envisage that future analysis will build on this to explore further how the Government's reforms will shape local economic growth.
