Which Antidepressant to Choose?

When prescribing an
antidepressant, the

first goal should be treating depression. Sometimes this may mean choosing an antidepressant that is more likely to cause weight gain even in someone who is overweight or choosing an antidepressant that doesn't treat another condition the person has, even if that option appears to be available.

How to Know Which Antidepressant Is Best for You

For a first episode of depression, a generic selective serotonin reuptake inhibitor such as citalopram, fluoxetine, paroxetine, or sertraline should be offered. For a recurrent episode, an antidepressant that has previously elicited a good response should be offered.
