How Does Purplebricks Work? | Purplebricks

Divide your outstanding mortgage amount by your property's current value. Multiply the result by 100. Example. Your outstanding mortgage is £150,000. Your lender thinks your property is worth £200,000. $150,000 \div 200,000 = 0.75$. $0.75 \times 100 = 75$ - so your loan-to-value is 75%. Use these links to get an idea of your home's current value.

How does remortgaging work? - Money Advice Service

As you consider your reasons for refinancing your mortgage loan, it's also important to consider the pitfalls of the process: Lengthening your loan term can result in paying more interest. Cashing out a portion of your equity will result in a higher loan amount on your new mortgage loan, which could increase your monthly payment.

How Does Refinancing a Mortgage Work? - Experian

This scheme is similar to a normal shared ownership scheme but it only lets you buy up to 75% of your home. Once you own 75%, you won't have to pay rent on the remaining share. If you have a long-term disability and cannot find a suitable home for your needs, you can get help with the 'Home Ownership for People with long-term Disabilities (HOLD)' scheme.
