Orthodontic treatment (usually with braces) is most often used to improve the appearance and alignment of crooked, protruding or crowded teeth, and to correct problems with the bite of the teeth. Why orthodontics is used The benefits of orthodontics can include: correction of dental crowding and straightening of your teeth

Orthodontics - NHS

Braces (orthodontic treatment) straighten or move teeth to improve the appearance of the teeth and how they work. Braces can be removable, so you can take them out and clean them, or fixed, so they're stuck to your teeth and you can't take them out. They can be made of metal, plastic or ceramic. Invisible braces are made of a clear plastic.

Dental treatments - NHS

With cosmetic dentistry, even the smallest changes can give your smile a whole new look and increase your confidence. Special Needs IM Dental is committed to ensuring that patients with special needs receive the same level of treatment as the general population.

Orthodontist vs. Dentist Training. Orthodontists and dentists undertake the same training initially, but orthodontists complete further training after they graduate dental school. To become a dentist, a person must complete four years of undergraduate education and four years of dental school, according to the American Dental Association. After completing their studies, dentists must pass a rigorous written exam and a clinical licensing exam before they're qualified to practice.

Orthodontist Vs. Dentist: Who Should You See?

The American Academy of Orthodontics (AAO) describes orthodontia as an area of dentistry that prevents, diagnoses and treats dental and facial irregularities. If you need orthodontic treatment, your family dentist will usually refer you to an orthodontist.

What Is Orthodontics? - Oral Health and Dental Care

Your dentist may even offer orthodontic services, leading you to assume that he/she is an orthodontist. But the truth is that putting aligners or braces on teeth does not make a doctor an orthodontist. Dentists, who are also known as general (or family) dentists, are concerned with overall oral health.
