A Study Of Induction Motor

An induction motor (also known as an asynchronous motor) is a commonly used AC electric motor. In an induction motor, the electric current in the rotor needed to produce torque is obtained via electromagnetic induction from the rotating magnetic field of the stator winding. The rotor of an induction motor can be a squirrel cage rotor or wound type rotor.

Induction Motor: How Does it Work? (Basics & Types ...

To solve these two concerns, this paper proposes a study to effectively improve induction motor efficiency and its power density. The stator winding of proposed three phase induction motor is rewound by decreasing number of turn and by increasing stator coil size.

A Study on Induction Motor Efficiency Improvement for ...

Induction motors are a type of AC motor invented in the late 1800s, and they are a practical application of the science of electromagnetism. These motors consist of stators and rotors, which are the stationary and rotational motor components, respectively. The stator - the motor housing - contains windings of wire connected to an AC power source, and the rotor - the free moving "armature" - is configured so that it can interact with the stator's coils via electromagnetism.

Slip ring-rotor motor is a type of induction motor where the rotor windings are connected through slip rings to external resistance. its speed can control without any outer motor control equipment.

Application of induction motor in daily life - Electricity ...

An induction motor or asynchronous motor is an AC electric motor in which the electric current in the

rotor needed to produce torque is obtained by electromagnetic induction from the magnetic field of the stator winding. An induction motor can therefore be made without electrical connections to the rotor. An induction motor's rotor can be either wound type or squirrel-cage type.

For an induction motor, torque T is developed by V^2 , thus on 50% tapping, torque at starting is only $(0.5V)^2$ of the obtained by DOL starting. Hence 25% torque is produced. Starters used in larger industries, it is larger in size and expensive.

Induction Motor Starting Methods - Bright Hub Engineering

June 5, 2018 by admin Out of all the electrical machines, Induction Motor is the most used machine in industries. More than 90% of motors used in industries are squirrel cage induction motor due to its rugged and maintenance free design. Generally an Induction Motor operates at almost constant speed as the load is varied.
