From the SAP Terminology Guide: "Enterprise SOA combines the technologies, standards, and approaches of a service-oriented architecture with a common business language that SAP co-defines with its ecosystem in the form of enterprise services.

enterprise SOA - Enterprise Services WIKI - Community

Wiki

Service-oriented architecture (SOA) is an enterprise-wide approach to software development that takes advantage of reusable software components, or services.

SOA vs. Microservices: What's the Difference? | IBM

Service-oriented architecture is a style of software design where services are provided to the other components by application components, through a communication protocol over a network. A SOA service is a discrete unit of functionality that can be accessed remotely and acted upon and updated independently, such as retrieving a credit card statement online. SOA is also intended to be independent of vendors, products and technologies. A service has four properties according to one of many defini

Service-oriented architecture - Wikipedia

An enterprise service bus (ESB) implements a communication system between mutually interacting software applications in a service-oriented architecture (SOA). It represents a software architecture for distributed computing, and is a special variant of the more general client-server model, wherein any application may behave as server or client.

Enterprise service bus - Wikipedia

The objective of Service Oriented Enterprise (SOE) is to present the principles and fundamental underpinnings of Web Services and Service Oriented Architectures (SOA). Special emphasis will be given to service definitions, service assembly, modeling, web services programming and design aspects of real-life applications in manufacturing.
