Nonlinear properties of dust acoustic waves are studied in Jupiter's magnetosphere. The space plasma contains Maxwellian distributed electrons, ions, and positively charged dust grains with nonuniform size distribution interacting with streaming electrons and ions coming from the solar wind.

Envelope solitons and rogue waves in Jupiter's magnetosphere

The background cold electron density plays an important role in plasma and wave dynamics. Here, we investigate an event with clear modulation of the particle fluxes and wave intensities by background electron density irregularities based on Van Allen Probes observations. The energies at the peak fluxes of protons and Helium ions of 100 eV to several keV are well correlated with the total electron density variation.

Electrostatic waves in a plasma | Physics Forums

Considering a system of positively charged different sizes of dust grains which interacts with streaming electrons and ions, modulational instability (MI) together with the formation of envelope solitons and rogue waves are studied in Jupiter's middle magnetosphere.

Envelope solitons and rogue waves in Jupiter's magnetosphere

Jupiter's magnetosphere (the region of space in which Jupiter's magnetic field influences the motion of charged particles) is the largest object in the solar system; it exhibits new phenomena and behaves, in some respects, like a pulsar. It is a magnetosphere whose physics is dominated by internal sources of plasma and energy.

Physics of the Jovian magnetosphere in SearchWorks catalog

When satellites discovered the radiation belt and began exploring the magnetosphere, a fourth direction opened, space plasma physics. From fusion research, space scientists borrowed the theory of plasma trapping by a magnetic field, and from ionospheric physics, the theory of plasma waves.
