A Basic Course in American Sign Language TJ Publishing

A Basic Course in Partial Differential Equations American Mathematical Soc.

This is a textbook for an introductory graduate course on partial differential equations. Han focuses on linear equations of first and second order. An important feature of his treatment is that the majority of the techniques are applicable more generally. In particular, Han emphasizes a priori estimates throughout the text, even for those equations that can be solved explicitly. Such estimates are indispensable tools for proving the existence and uniqueness of solutions to PDEs, being especially important for nonlinear equations. The estimates are also

crucial to establishing properties of the solutions, such as the continuous dependence on parameters. Han's book is suitable for students interested in the mathematical theory of partial differential equations, either as an overview of the subject or as an introduction leading to further study.

A Basic Course in Real Analysis *CRC Press*

Based on the authors' combined 35 years of experience in teaching, *A Basic Course in Real Analysis* introduces students to the aspects of real analysis in a friendly way. The authors offer insights into the way a typical mathematician works observing patterns, conducting experiments by means of looking at or creating examples, trying to understand the underlying principles, and coming up with guesses or conjectures and then proving them rigorously based on his or her explorations. With more than 100 pictures, the book creates interest in real analysis by encouraging students

to think geometrically. Each difficult proof is prefaced by a strategy and explanation of how the strategy is translated into rigorous and precise proofs. The authors then explain the mystery and role of inequalities in analysis to train students to arrive at estimates that will be useful for proofs. They highlight the role of the least upper bound property of real numbers, which underlies all crucial results in real analysis. In addition, the book demonstrates analysis as a qualitative as well as quantitative study of functions, exposing students to arguments that fall under hard analysis. Although there are many books available on this subject, students often find it difficult to learn the essence of analysis

on their own or after going through a course on real analysis. Written in a conversational tone, this book explains the hows and whys of real analysis and provides guidance that makes readers think at every stage.

A Basic Course in Manual Communication

A Basic Course in Anthropological Linguistics *Canadian Scholars Press*

Language can be studied from several angles. The focus on the relation between language, thought, and culture is known as anthropological linguistics (AL). This text constitutes a basic introduction to the subject and techniques of AL. Traditionally, anthropological linguists have aimed to document and study the languages of indigenous cultures, especially North American ones. Today, however, the purview of this exciting science has been extended considerably to encompass the study

of language as a general cultural phenomenon, and to determine genealogical relations among languages, so as to recreate ancient cultures through them. In non-technical language, with plenty of examples related to languages across the world, this book introduces the basic notions, concepts, and techniques of AL. It also discusses the origin and evolution of language, focusing on the comparison and reconstruction of language families. Its treatment of techniques for analysing sounds, words, sentences, and meanings introduces the reader to what must be understood about language and its structure in order to apply that knowledge

to the study of thought and culture. and how languages influence cognition. To enhance the text's pedagogical utility, a set of practical activities and topics for study accompany each of the eight chapters. A glossary of technical terms is also included. The overall objective of the book is to show how the technical methodology of linguistic analysis can help students gain a deeper understanding of language as a strategy for classifying the world. The book's underlying premise is that the distinction between language and knowledge is hardly ever clear-cut. Indeed, the two enter into a constant synergy - a synergy that defines the human condition.

Race for Profit

How Banks and the

**Real Estate Industry
Undermined Black
Homeownership**

UNC Press Books

LONGLISTED FOR THE 2019 NATIONAL BOOK AWARD FINALIST, 2020 PULITZER PRIZE IN HISTORY By the late 1960s and early 1970s, reeling from a wave of urban uprisings, politicians finally worked to end the practice of redlining. Reasoning that the turbulence could be calmed by turning Black city-dwellers into homeowners, they passed the Housing and Urban Development Act of 1968, and set about establishing policies to induce mortgage lenders and the real estate industry to treat Black homebuyers equally. The disaster that ensued revealed that racist exclusion

had not been eradicated, but rather transmuted into a new phenomenon of predatory inclusion. *Race for Profit* uncovers how exploitative real estate practices continued well after housing discrimination was banned. The same racist structures and individuals remained intact after redlining's end, and close relationships between regulators and the industry created incentives to ignore improprieties. Meanwhile, new policies meant to encourage low-income homeownership created new methods to exploit Black homeowners. The federal government guaranteed urban mortgages in an attempt to overcome

resistance to lending to Black buyers – as if unprofitability, rather than racism, was the cause of housing segregation. Bankers, investors, and real estate agents took advantage of the perverse incentives, targeting the Black women most likely to fail to keep up their home payments and slip into foreclosure, multiplying their profits. As a result, by the end of the 1970s, the nation's first programs to encourage Black homeownership ended with tens of thousands of foreclosures in Black communities across the country. The push to uplift Black homeownership had descended into a goldmine for realtors and mortgage lenders, and a ready-made

cudgel for the champions of deregulation to wield against government intervention of any kind. Narrating the story of a sea-change in housing policy and its dire impact on African Americans, *Race for Profit* reveals how the urban core was transformed into a new frontier of cynical extraction.

Hitler's American Gamble

Pearl Harbor and Germany's March to Global War *Basic Books*

A riveting account of the five most crucial days in twentieth-century diplomatic history: from Pearl Harbor to Hitler's

declaration of war on the United States By early December 1941, war had changed much of the world beyond recognition. Nazi Germany occupied most of the European continent, while in Asia, the Second Sino-Japanese War had turned China into a battleground. But these conflicts were not yet inextricably linked—and the United States remained at peace. Hitler's American Gamble recounts the five days that upended everything: December 7 to 11. Tracing developments in real time and backed by deep archival research, historians Brendan Simms and Charlie Laderman show how Hitler's intervention was not the inexplicable decision of

a man so bloodthirsty that he forgot all strategy, but a calculated risk that can only be understood in a truly global context. This book reveals how December 11, not Pearl Harbor, was the real watershed that created a world war and transformed international history.

The Storytelling Secrets of the New Masters of Radio

Broadway Books

Go behind the scenes of our most ambitious radio programs and witness an intensely creative moment in a medium that's changing the way we tell stories. Every week, millions of devoted fans download or tune in to *This American Life*, *The*

Moth, Radiolab, Planet Money, Snap Judgment, Radio Diaries, 99% Invisible, and other nonfiction narrative radio shows. The compelling stories they produce are almost cinematic in scope and approach—intricately weaving sound into robust and engaging storytelling. A lot goes into making the shows we love. Anchored by surprising characters and big questions, their stories are tightly structured, edited, and soundtracked, and they introduce us to authentic voices from every walk of life. Radio and podcasts today are entrepreneurial and DIY; there's a can-do, collaborative spirit that characterizes people working in this field, fearlessly breaking new artistic ground. And more than ever, given the excellence and explosive popularity of shows like Serial, it's clear that the creative producers working in this medium hold the key to storytelling secrets that the rest of us must learn. Out on the Wire, a documentary comic, literally illustrates those secrets, gleaned straight from those on the frontlines of radio's revolution. With the help of This American Life's Ira Glass, cartoonist Jessica Abel uncovers just how producers construct a story, spilling some juicy insider details along the way. Jad Abumrad of RadioLab talks about chasing moments of awe with scientists, while Planet Money's Robert Smith speaks candidly about

his slightly embarrassing strategy for putting interviewees at ease. And Abel reveals how mad—really mad—Ira Glass becomes when he receives tough edits from his colleagues. Informative and inventive, *Out on the Wire* shows us the magic that makes these shows great and why we can't stop listening to them.

Rescuing Socrates

How the Great Books Changed My Life and Why They Matter for a New Generation *Princeton University Press*

A Dominican-born academic tells the story of how the Great Books transformed his life—and why they have the power to speak to people of all backgrounds. What is the value of a liberal education?

Traditionally characterized by a rigorous engagement with the classics of

Western thought and literature, this approach to education is all but extinct in American universities, replaced by flexible distribution

requirements and ever-narrower academic specialization. Many academics attack the very idea of a Western canon as chauvinistic, while the general public increasingly doubts the value of the humanities. In

Rescuing Socrates, Dominican-born American academic Roosevelt Montás tells the story of how a liberal education transformed his life, and offers an intimate account of the relevance of the Great Books today, especially to members of historically marginalized communities. Montás

emigrated from the Dominican Republic to Queens, New York, when he was twelve and encountered the Western classics as an undergraduate in Columbia University's renowned Core Curriculum, one of America's last remaining Great Books programs. The experience changed his life and determined his career—he went on to earn a PhD in English and comparative literature, serve as director of Columbia's Center for the Core Curriculum, and start a Great Books program for low-income high school students who aspire to be the first in their families to attend college. Weaving together memoir and literary reflection, *Rescuing Socrates*

describes how four authors—Plato, Augustine, Freud, and Gandhi—had a profound impact on Montás's life. In doing so, the book drives home what it's like to experience a liberal education—and why it can still remake lives.

CPR/AED for the Professional Rescuer *Amer Red Cross*

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill

sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can

be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer—the responsibility to save lives.

Occupational Therapy Practice Framework

Domain & Process *Amer Occupational Therapy Assn*

The Framework, an official AOTA document, presents a summary of interrelated constructs that define and guide occupational therapy practice. The

Framework was developed to articulate occupational therapy's contribution to promoting the health and participation of people, organizations, and populations through engagement in occupation. The revisions included in this second edition are intended to refine the document and include language and concepts relevant to current and emerging occupational therapy practice. Implicit within this summary are the profession's core

beliefs in the positive relationship between occupation and health and its view of people as occupational beings. Numerous resource materials include a glossary, references and a bibliography, as well as a table of changes between the editions.
