Seeds even have their own food supply to start them off, at least until they can put down roots and draw food and water from the soil. Some seeds are quite unfussy about the conditions that trigger them into growth and many weed seeds fall into that category. Others are so sensitive they require a carefully controlled environment to germinate. Fortunately, the great majority of flower and vegetable seeds will emerge from their big sleep quite readily if a few common sense guidelines are ...

When to sow seed. As long as the soil is warm and moist, seed can be sown and it will germinate quickly. In practice, this usually means either mid-spring to early summer (April-June), or late summer (September). If you can provide the crop with protection, such as cloches or fleece, sowing can begin in early spring.
