Classical test theory (CTT) is the foundational theory of measurement of mental abilities. At its core, CTT describes the relationship between observed composite scores on a test and a presumed but unobserved “true” score for an examinee. CTT is called “classical” because it is thought to be the first operational use of mathematics to characterize this relationship (cf. Gullicksen, 1950).

This chapter gives a succinct introduction to classical test theory, an early attempt to formalize a statistical theory of psychological measurement. The main focus is on reliability. After introducing the true score model, the following reliability coefficients are presented: Cronbach's α , greatest lower bound, and McDonald's ω 's. In the second part of this chapter, this simple definition of reliability idea is extended to multiple error sources.
