21 Lessons for the 21st Century Random House

#1 NEW YORK TIMES BESTSELLER • In Sapiens, he explored our past. In Homo Deus, he looked to our future. Now, one of the most innovative thinkers on the planet turns to the present to make sense of today's most pressing issues. "Fascinating . . . a crucial global conversation about how to take on the problems of the twenty-first century."—Bill Gates, The New York Times Book Review NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES AND PAMELA PAUL, KQED How do computers and robots change the meaning of being human? How do we deal with the epidemic of fake news? Are nations and religions still relevant? What should we teach our children? Yuval Noah Harari's 21 Lessons for the 21st Century is a probing and visionary investigation into today's most urgent issues as we move into the uncharted territory of the future. As technology advances faster than our understanding of it, hacking becomes a tactic of war, and the world feels more polarized than ever, Harari addresses the challenge of navigating life in the face of constant and disorienting change and raises the important questions we need to ask ourselves in order to survive. In twenty-one accessible chapters that are both provocative and profound, Harari builds on the ideas explored in his previous books, untangling political, technological, social, and existential issues and offering advice on how to prepare for a very different future from the world we now live in: How can

we retain freedom of choice when Big Data is watching us? What will the future workforce look like, and how should we ready ourselves for it? How should we deal with the threat of terrorism? Why is liberal democracy in crisis? Harari’s unique ability to make sense of where we have come from and where we are going has captured the imaginations of millions of readers. Here he invites us to consider values, meaning, and personal engagement in a world full of noise and uncertainty. When we are deluged with irrelevant information, clarity is power. Presenting complex contemporary challenges clearly and accessibly, 21 Lessons for the 21st Century is essential reading. “If there were such a thing as a required instruction manual for politicians and thought leaders, Israeli historian Yuval Noah Harari’s 21 Lessons for the 21st Century would deserve serious consideration. In this collection of provocative essays, Harari . . . tackles a daunting array of issues, endeavoring to answer a persistent question: ‘What is happening in the world today, and what is the deep meaning of these events?’”—BookPage (top pick)

Sapiens

A Brief History of Humankind *Harper Collins*

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity’s creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with

contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

Big Bang Disruption

Strategy in the Age of Devastating Innovation *Penguin*

It used to take years or even decades for disruptive innovations to dethrone dominant products and services. But now any business can be devastated virtually overnight by something better and cheaper. How can executives protect themselves and harness the power of Big Bang Disruption? Just a few years ago, drivers happily spent more than \$200 for a GPS unit. But as smartphones exploded in popularity, free navigation apps exceeded the performance of stand-alone devices. Eighteen months after the debut of the navigation apps, leading GPS manufacturers had lost 85 percent of their market value. Consumer electronics and computer makers have long struggled in a world of exponential technology improvements and short product life spans. But until recently, hotels, taxi services, doctors, and energy companies had little to fear from the information revolution. Those days are gone forever. Software-based products are replacing physical goods. And every service provider must compete with cloud-based tools that offer customers a better way to interact. Today, start-ups with minimal experience and no capital can unravel your strategy before you even begin to grasp what’s happening. Never mind the “innovator’s dilemma”—this is the innovator’s disaster. And it’s happening in nearly every industry. Worse, Big Bang Disruptors may not even see you as competition. They don’t share your approach to customer service, and they’re not sizing up your product line to offer better prices. You may simply be collateral damage in their efforts to win completely different markets. The good news is that any business can master the strategy of the start-ups. Larry Downes and Paul Nunes analyze the origins, economics, and anatomy of Big Bang Disruption. They identify four key stages of the new innovation life cycle, helping you spot potential disruptors in time. And they offer twelve rules for defending your markets, launching disruptors of your own, and getting out while there’s still time. Based on extensive research by the Accenture Institute for High Performance and in-depth interviews with entrepreneurs, investors, and executives from more than thirty industries, Big Bang Disruption will arm you with strategies and insights to thrive in this brave new world.

"Promise Me You'll Shoot Yourself"

The Mass Suicide of Ordinary Germans in 1945 *Little, Brown Spark*

Named a Best History Book of 2019 by The Times (UK) The astounding true story of how thousands of ordinary Germans, overcome by shame, guilt, and fear, killed themselves after the fall of the Third Reich and the end of World War II. By the end of April 1945 in Germany, the Third Reich had fallen and invasion was underway. As the Red Army advanced, horrifying stories spread about the depravity of its soldiers. For many German people, there seemed to be nothing left but disgrace and despair. For tens of thousands of them, the only option was to choose death -- for themselves and for their children. "Promise Me You'll Shoot Yourself" recounts this little-known mass event. Using diaries, letters, and memoirs, historian Florian Huber traces the euphoria of many ordinary Germans as Hitler restored national pride; their indifference as the Führer's political enemies, Jews, and other minorities began to suffer; and the descent into despair as the war took its terrible toll, especially after the invasion of the Soviet Union. Above all, he investigates how suicide became a contagious epidemic as the country collapsed. Drawing on eyewitness accounts and other primary sources, "Promise Me You'll Shoot Yourself" presents a riveting portrait of a nation in crisis, and sheds light on a dramatic yet largely unknown episode of postwar Germany.

Homo Deus

A Brief History of Tomorrow *HarperCollins*

Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity’s future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from bingeing at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

Stella Grove Press

From the internationally bestselling author of *The Club* comes a gripping historical novel of love and betrayal, set in wartime Berlin In 1942, Friedrich, an even-keeled but unworldly young man, arrives in Berlin from bucolic Switzerland with dreams of becoming an artist. At a life drawing class, he is hypnotized by the beautiful model, Kristin, who soon becomes his energetic yet enigmatic guide to the bustling and cosmopolitan city. Kristin teaches the naïve Friedrich how to take care of himself in a city filled with danger, and brings him to an underground jazz club where they drink cognac, dance, and kiss. The war feels far away to Friedrich as he falls in love with Kristin, the pair cocooned inside their palatial rooms at the Grand Hotel, where even Champagne and fresh fruit can be obtained thanks to the black market. But as the months pass, the mood in the city darkens yet further, with the Nazi Party tightening their hold on everyday life of all Berliners, terrorizing anyone who might be disloyal to the Reich. Kristin’s loyalties are unclear, and she is not everything she seems, as his realizes when one frightening day she comes back to Friedrich’s hotel suite in tears, battered and bruised. She tells him an astonishing secret: that her real name is Stella, and that she is Jewish, passing for Aryan. Fritz comforts her, but he soon realizes that Stella’s control of the situation is rapidly slipping out of her grasp, and that the Gestapo have an impossible power over her. As Friedrich confronts Stella’s unimaginable choices, he finds himself woefully unprepared for the history he is living through. Based in part on a real historical character, Stella sets a tortured love story against the backdrop of wartime Berlin, and powerfully explores questions of naiveté, young love, betrayal, and the horrors of history.

Theory U

Learning from the Future as It Emerges Berrett-Koehler Publishers

Shows how leaders can access the deepest source of inspiration and vision • Includes dozens of tested exercises, practices, and real-world examples We live in a time of massive institutional failure, one that requires a new consciousness and a new collective leadership capacity. In this groundbreaking book, Otto Scharmer invites us to see the world in new ways and in so doing discover a revolutionary approach to leadership. What we pay attention to and how we pay attention is key to what we create. What prevents us from attending to situations more effectively is that we aren’t fully aware of and in touch with the inner place from which attention and intention originate. This is what Scharmer calls our blind spot. By moving through Scharmer’s U process, we consciously access the blind spot and learn to connect to our authentic Self—the deepest source of knowledge and inspiration—in the realm of “presencing,” a term coined by Scharmer that combines the concepts of presence and sensing. Based on ten years of research and action learning and interviews with over 150 practitioners and thought leaders, Theory U offers a rich diversity of compelling stories and examples and includes dozens of exercises and practices that allow leaders, and entire organizations, to shift awareness, connect with the best future possibility, and gain the ability to realize it.

Bottom's Dream *German Literature Series*

"I have had a dream past the wit of man to say what dream it was," says Bottom. "I have had a dream, and I wrote a Big Book about it," Arno Schmidt might have said. Schmidt's rare vision is a journey into many literary worlds. First and foremost it is about Edgar Allan Poe, or perhaps it is language itself that plays that lead role; and it is certainly about sex in its many Freudian disguises, but about love as well, whether fragile and unfulfilled or crude and wedded. As befits a dream upon a heath populated by elemental spirits, the shapes and figures are protean, its protagonists suddenly transformed into trees, horses, and demigods. In a single day, from one midsummer dawn to a fiery second, Dan and Franzisca, Wilma and Paul explore the labyrinths of literary creation and of their own dreams and desires. Since its publication in 1970 Zettel's Traum/Bottom's Dream has been regarded as Arno Schimdt's magnum opus, as the definitive work of a titan of postwar German literature. Readers are now invited to explore its verbally provocative landscape in an English translation by John E. Woods.
