Egyptian Hieroglyphs in the Late Antique Imagination *University of Pennsylvania Press*

Throughout the pharaonic period, hieroglyphs served both practical and aesthetic purposes. Carved on stelae, statues, and temple walls, hieroglyphic inscriptions were one of the most prominent and distinctive features of ancient Egyptian visual culture. For both the literate minority of Egyptians and the vast illiterate majority of the population, hieroglyphs possessed a potent symbolic value that went beyond their capacity to render language visible. For nearly three thousand years, the hieroglyphic script remained closely bound to indigenous notions of religious and cultural identity. By the late antique period, literacy in hieroglyphs had been almost entirely lost. However, the monumental temples and tombs that marked the Egyptian landscape, together with the hieroglyphic inscriptions that adorned them, still stood as inescapable reminders that Christianity was a relatively new arrival to the ancient land of the pharaohs. In Egyptian Hieroglyphs in the Late Antique Imagination, Jennifer Westerfeld argues that depictions of hieroglyphic inscriptions in late antique Christian texts reflect the authors' attitudes toward Egypt's pharaonic past. Whether hieroglyphs were condemned as idolatrous images or valued as a source of mystical knowledge, control over the representation and interpretation of hieroglyphic texts constituted an important source of Christian authority. Westerfeld examines the ways in which hieroglyphs are deployed in the works of Eusebius and Augustine, to debate biblical chronology; in Greek, Roman, and patristic sources, to claim that hieroglyphs encoded the mysteries of the Egyptian priesthood; and in a polemical sermon by the fifth-century monastic leader Shenoute of Atripe, to argue that hieroglyphs should be destroyed lest they promote a return to idolatry. She argues that, in the absence of any genuine understanding of hieroglyphic writing, late antique Christian authors were able to take this powerful symbol of Egyptian identity and manipulate it to serve their particular theological and ideological ends.

The Writing of the Gods *Simon and Schuster*

The surprising and compelling story of two rival geniuses in an all-out race to decode one of the world's most famous documents--the Rosetta Stone--and their twenty-year-long battle to solve the mystery of ancient Egypt's hieroglyphs. The Rosetta Stone is one of the most famous objects in the world, attracting millions of visitors to the British museum ever year, and yet most people don't really know what it is. Discovered in a pile of rubble in 1799, this slab of stone proved to be the key to unlocking a lost language that baffled scholars for centuries. Carved in ancient Egypt, the Rosetta Stone carried the same message in different languages--in Greek using Greek letters, and in Egyptian using picture-writing called hieroglyphs. Until its discovery, no one in the world knew how to read the hieroglyphs that covered every temple and text and statue in Egypt. Dominating the world for thirty centuries, ancient Egypt was the mightiest empire the world had ever known, yet everything about it--the pyramids, mummies, the Sphinx--was shrouded in mystery. Whoever was able to decipher the Rosetta Stone, and learn how to read hieroglyphs, would solve that mystery and fling open a door that had been locked for two thousand years. Two brilliant rivals set out to win that prize. One was English, the other French, at a time when England and France were enemies and the world's two great superpowers. The Writing of the Gods chronicles this high-stakes intellectual race in which the winner would win glory for both himself and his nation. A riveting portrait of empires both ancient and modern, this is an unparalleled look at the culture and history of ancient Egypt and a fascinating, fast-paced story of human folly and discovery unlike any other.

The Riddle of the Rosetta *Princeton University Press*

A major new history of the race between two geniuses to decipher ancient Egyptian hieroglyphs, set against the backdrop of nineteenth-century Europe In 1799, a French Army officer was rebuilding the defenses of a fort on the banks of the Nile when he discovered an ancient stele fragment bearing a decree inscribed in three different scripts. So begins one of the most familiar tales in Egyptology—that of the Rosetta Stone and the decipherment of Egyptian hieroglyphs. This book draws on fresh archival evidence to provide a major new account of how the English polymath Thomas Young and the French philologist Jean-François Champollion vied to be the first to solve the riddle of the Rosetta. Jed Buchwald and Diane Greco Josefowicz bring to life a bygone age of intellectual adventure. Much more than a decoding exercise centered on a single artifact, the race to decipher the Rosetta Stone reflected broader disputes about language, historical evidence, biblical truth, and the value of classical learning. Buchwald and Josefowicz paint compelling portraits of Young and Champollion, two gifted intellects with altogether different motivations. Young disdained

Egyptian culture and saw Egyptian writing as a means to greater knowledge about Greco-Roman antiquity. Champollion, swept up in the political chaos of Restoration France and fiercely opposed to the scholars aligned with throne and altar, admired ancient Egypt and was prepared to upend conventional wisdom to solve the mystery of the hieroglyphs. Taking readers from the hushed lecture rooms of the Institut de France to the windswept monuments of the Valley of the Kings, The Riddle of the Rosetta reveals the untold story behind one of the nineteenth century's most thrilling discoveries.

Comparative material, emphasizing Old Kingdom models, is presented in 175 line drawings. By familiarizing themselves with this material, along with the points made in the Introduction, students will, at the same time, learn a good deal about hieroglyphic palaeography"--Publisher's description.

Egyptology: The Missing Millennium *Routledge*

Egyptology: The Missing Millennium brings together for the first time the disciplines of Egyptology and Islamic Studies, seeking to overturn the conventional opinion of Western scholars that Moslems/Arabs had no interest in pre-Islamic cultures. This book examines a neglected period of a thousand years in the history of Egyptology, from the Moslem annexation of Egypt in the seventh century CE until the Ottoman conquest in the 16th

century. Concentrating on Moslem writers, as it is usually Islam which incurs blame for cutting Egyptians off from their ancient heritage, the author shows not only the existence of a large body of Arabic sources on Ancient Egypt, but also their usefulness to Egyptology today. Using sources as diverse as the accounts of travelers and treasure hunters to books on alchemy, the author shows that the interest in ancient Egyptian scripts continued beyond classical writers, and describes attempts by medieval Arab scholars, mainly alchemists, to decipher the hieroglyph script. He further explores medieval Arab interest in Ancient Egypt, discussing the interpretations of the intact temples, as well as the Arab concept of Egyptian kingship and state administration—including a case study of Queen Cleopatra that shows how the Arabic romance of this queen differs significantly from Western views. This book will be of great interest to academics and students of archaeology, Islamic studies and Egyptology, as well as anyone with a general interest in Egyptian history.
