Building Construction 1 Flooring System

The term 'flooring' refers to the lower enclosing surface of spaces within buildings. This may be part of the floor structure, such as the upper surface of a concrete slab or floor boards, but typically it is a permanent covering laid over the floor.

Types of flooring - Designing Buildings Wiki

Introduction According to Approved Document C, a floor is the 'lower

horizontal surface of any space in a building, including finishes that are laid as part of the permanent construction.' A floor typically provides: Structural support for the contents of the room, its occupants, and the weight of the floor itself.

Types of floor - Designing Buildings Wiki

The construction system is most efficient for column grids of approximately 9 m by 9 m. The units provide a flat soffit. For semi-exposed applications, such as car parks, precast units may be a more durable alternative than steel decking (although with the correct detailing and coatings it is certainly possible to use decking

in such applications).

69 Chapter 4 FLOOR CONSTRUCTION

Woodframe floor systems and concrete slab-on-grade floors are discussed in this chapter. Although cold-formed steel framing for floor systems also is permitted by the IRC, it is not covered here; rather, the reader is referred to the AISI Standard for Cold-Formed Steel Framing – Prescriptive Method for One- and Two-Family Dwellings (AISI, 2001) for guidance.

Chapter 4 FLOOR CONSTRUCTION

Summary. Floor systems must transfer their loads horizontally across space to either beams and columns or to load-bearing walls. Rigid floor planes can also be designed to serve as horizontal

diaphragms that act as thin, wide beams in transferring lateral forces to shear walls. A floor system may be composed of a series of linear beams and joists overlaid with a plane of sheathing or decking, or consist of a nearly homogeneous slab of reinforced concrete.

Floor Systems - European Building Construction Illustrated ...

One-Way Joist Floor System. It consists of uniformly spaced concrete ribs spanning in one direction, reinforced concrete slab constructed monolithically with ribs and beams which are spanning between columns. On way joist floor system is economically suitable for spans of 6 to 9m

and live load of 4 to 6KN/m 2.

Types of Economical Floor Systems for Reinforced Concrete

...

Floor Joists. A floor's framework is made up mostly of wooden joists that run parallel to one another at regular intervals. Floor joists are typically 2 by 8s, 2 by 10s, or 2 by 12s; ceiling joists are usually 2 by 6s or sometimes 2 by 4s if it is an older home. Some newer homes have manufactured, I beam-shaped joists.

Floor Framing & Structure | HomeTips

Following are some of the major types of floors: 1. Mud Floor: Earthen Flooring also commonly known as Adobe flooring is made

up of dirt, raw earth or other unworked ground materials. In modern times, it is usually constructed with mixture of sand, clay and finely chopped straw.

Floors - Types of floors - Methods of Construction of Floor

Floor Insulation.

Reduce heat loss and avoid thermal bridges at the junction of the floors and walls by including a layer of thermal insulation in the floor construction that is continuous with that in the rest of the building envelope.

DuPont™ Styrofoam™ Brand Extruded Polystyrene (XPS) Foam Insulation is a cost-effective solution for improving the thermal performance of residential and

commercial floor applications.

Flooring | DuPont Performance Building Solutions

Floor Systems. The use of timber floors has been around for centuries and the performance is dependent on the use of the floor. Timber floor structures are engineered, designed and built to achieve structural compliance as well as acoustic, fire and in some instances, thermal performance. For most floor designs and installations it is the serviceability checks that dictate the spacing and size of floor joists or the depth of solid floors.

Floor Systems Structural Timber Association

FP McCann is one of

the UK's leading manufacturers of high-quality precast concrete floors. A family run business with over 60 years' experience, we offer an extensive range of precast concrete flooring solutions including beam and block/poly flooring, ThermaBeam™ flooring, hollowcore flooring, stairs and landings to the industrial, commercial and domestic markets.

Precast Concrete Floors | Flooring UK | FP McCann

The construction of ground floors typically includes ground supported concrete slabs; suspended concrete floors (including beam and block systems), and suspended timber floors. The BRE's Good

Building Guide 28, Part 1, provides specific constructional details for these floors. BRE highlights that a ground floor construction's primary

function is to prevent the transfer of moisture from the surrounding ground through it and into the interior of the building.
