In Italy it seems we are a bit late from this point of view and many new translator have never heard of such a service. Thanks in advance for your contribution!

Machine Translation Post Editing - recruiting | GALA Global

MT Systems. Generic MT usually refers to platforms such as Google Translate, Bing, Yandex, and Naver. These platforms provide MT for ad hoc translations to millions of people. Companies can buy generic MT for batch pre-translation and connect to their own systems via API.

What is Machine Translation? | GALA Global

The obvious post-editing environment seems to be a translation memory (TM) system, but it is intended for a slightly different purpose and it needs to be directly linked to the MT engine in order to facilitate post-editing work (e.g. by avoiding rework on inline tags).

What is Post-Editing and Why is It

So Hard? | GALA Global

Post-editing replaces conventional translation for MT projects. It is a skill that translators develop with time and experience – there is a learning curve associated with PE. The market makes a distinction between light and full post-editing and both concepts are explained in the course materials. The course explains the post-editing phase in detail and includes guidance on how to post-edit effectively as well as common patterns and behaviors of MT output to watch out for during post-editing.

Post Editing Machine Translation Gala Global

Post-editing (or postediting) is the process whereby humans amend machine-generated translation to achieve an acceptable final product. A person who post-edits is called a post-editor. The concept of post-editing is linked to that of pre-editing. In the process of translating a text via machine translation, best results may be gained by pre-editing the source text – for example by applying the ...

Postediting - Wikipedia

Machine Translation Post-Editing Is Not As Important As You Think. Recently, Moravia joined some of the best and brightest of the language services industry for a GALA webinar called Translation Trends for 2015. Sponsored and moderated by Memsource, a cloud-based CAT platform provider, the session's focus was on the technical aspects of workflow engineering and what translation tool users and buyers can expect in the space.

Machine Translation Post-Editing Is Not As Important As ...

Machine translation plus post-editing is a hybrid of MT and traditional, human translation. As its name suggests, post-editing follows the MT process. First,

software produces an initial translation of the material, making short work of bulk translation tasks.

Machine Translation vs. Machine Translation Plus Post-Editing

By: Alessandro Cattelan. In 2012, post-editing accounted for around 30% of Translated.net's turnover. We see machine translation post-editing as an extremely promising approach to translation, and we believe that machine translation will eventually become the standard suggestion source in CAT tools.

A Fair Rate for Post-editing - Matecat

The post-editing of machine translation (PEMT) by a human translator, although not as fast as the original machine

translation, can make your content more refined and professional and add that "human touch" after the machine output. How do you know when you can get rid of pure machine translation and when machine translation plus post-editing is your best choice?

Machine translation and 2 levels of Post-Editing of ...

Light post-editing. This involves taking the raw MT output and performing as few modifications as possible to the text in order to make the translation understandable, factually accurate, and grammatically correct. Light post-editing tasks include: correcting only the most obvious typos, word, and grammatical errors.

Light and Full MT Post-Editing Explained - RWS
