Solve Inequality And Graph Solution
 Step 1 We must solve for one unknown in one equation. We can choose either x or y in either the first or second equation. Step 2 Substitute the value of x into the other equation. In this case the equation is $2x + 3y = 1$. Substituting

Solved: Solve the inequality and graph the solution set ...

The steps to solve linear inequalities are

the same as linear equations, except if you multiply or divide by a negative when solving for the variable, you must reverse the inequality symbol. Example: Solve. Express the solution as an inequality, graph and interval notation. $x + 4 > 7$. $-2x > 8$. $x/-2 > -1$. $x - 9 \geq -12$.

Solving Inequalities (video lessons, examples, solutions)

To solve your inequality using the Inequality Calculator, type in your inequality like $x + 7 > 9$. The inequality solver will then show you the steps to help you learn how to solve it on your own. Less Than Or Equal To Type $\leq$ for "less than or equal to".

Inequality Calculator - MathPapa

The solutions for inequalities generally

involve the same basic rules as equations. There is one exception, which we will soon discover. The first rule, however, is similar to that used in solving equations. If the same quantity is added to each side of an inequality, the results are unequal in the same order.

Solve inequalities with Step-by-Step Math Problem Solver

Now divide each part by 2 (a positive number, so again the inequalities don't change): $-6 < -x < 3$. Now multiply each part by -1 . Because we are multiplying by a negative number, the inequalities change direction. $6 > x > -3$. And that is the solution! But to be neat it is better to have the smaller number on the left, larger on the right.

Solving Inequalities - MATH

The solution of a quadratic inequality are all of the points within the area $y > X^2 - 1$ where $y = 0$. In other words, the solution of a quadratic equation holds the same meaning that you are accustomed to. The solution is just where the graph crosses the X-axis. The new twist is that instead of just two or fewer points.

Graph and Solve Quadratic Inequalities. Step by step ...

Inequality Calculator This calculator will solve the linear, quadratic, polynomial, rational and absolute value inequalities. It can handle compound inequalities and systems of inequalities as well. To graph inequalities, use the graphing calculator.

Inequality Calculator - eMathHelp

The solution to the given inequality will be the set of all points that are more than two units away from zero. For instance, -3 will work, as will $+3$; -4 will work, as will $+4$. But -1 will not work, and neither will $+1$, because they're too close to zero.

Absolute-Value Inequalities | Purplemath

When you're solving an absolute-value inequality that's greater than a number, you write your solutions as or statements. Take a look at the following example: $|3x - 2| > 7$. You can rewrite this inequality as $3x - 2 > 7$ OR $3x - 2 < -7$. You have two solutions: $x > 3$ or $x < -5/3$. In interval notation, this solution is

How to Express Solutions for Inequalities with Interval ...

Divide all sides of the inequality by -3 (since the inequality is being divided by a negative number so the signs of the inequality will be reversed), $-6 - 3 \geq -3a - 3 \geq 9 - 3 \geq a \geq -3$

Solve the inequality. Graph the solution, if possible. - 2 ...

Now an inequality uses a greater than, less than symbol, and all that we have to do to graph an inequality is find the the number, '3' in this case and color in everything above or below it. Just remember. if the symbol is ($\geq$ or $\leq$) then you fill in the dot, like the top two examples in the graph below

Free math problem solver answers your algebra, geometry, trigonometry, calculus, and statistics homework questions with step-by-step explanations, just like a math tutor.

Solving linear inequalities by graphing is really simple. Follow the above steps to draw the inequalities. Once drawn, the shaded area is a solution to that inequality. If there are more than one inequality then the common shaded area is a solution to inequalities.
