Handbook of Industrial Water Soluble Polymers

Water soluble polymers cover a wide range of highly varied families of products of natural or synthetic origin, and have numerous uses. Among these families, synthetic polymers, and more particularly coagulants and flocculants, are used mainly for facilitating the separation of materials in suspension in aqueous media. They

Water Soluble Polymers - SNF

Synthetic water-soluble polymers are organic materials that dissolve, disperse, or swell in water and thus modify the physical properties of the resulting aqueous system. These macromolecules act as dispersants, suspending agents, thickeners, stabilizers, coagulants, flocculants, film-formers, binders, humectants, and lubricants in aqueous media. In addition, some water-soluble polymers serve as starting materials for other water-soluble materials.
