The Earth environment is complex on almost every scale, from global to microscopic. The environment in which groundwater exists, and groundwater contamination occurs, is similarly complex. Consequently, there is a seemingly reasonable presumption that more is better with respect to sample size in investigations of groundwater contamination cases.

Earth Environment - an overview | ScienceDirect Topics

Earth science encompasses four main branches of study, the lithosphere, the hydrosphere, the atmosphere, and the biosphere, each of which is further broken down into more specialized fields. There are both reductionist and holistic approaches to Earth sciences. It is also the study of Earth and its neighbors in space. Some Earth scientists use their knowledge of the planet to locate and develop energy and mineral resources. Others study the impact of human activity on Earth's environment ...
