AMS :: Curtis: Pioneers of Representations Theory

Historically, the representation theory of nite groups was developed with the same mo-tivation: Turning problems in group theory into problems in linear algebra. The study began with Cauchy and Dedekind's work in the early 1800s on what later became char-acter theory [Cau41, Ded85, Tau33]. However, Frobenius was the rst mathematician to

In Pioneers of Representation Theory he has set to present the historical development of the main ideas of the discipline, starting in the 1890s with the work of Georg Ferdinand Frobenius and up until 1960.

Curtis, Charles W. Pioneers of Representation theory ...

KEITH CONRAD Abstract. Representation theory was created by Frobenius about 100 years ago. We describe the background that led to the problem which motivated Frobenius to dene characters of a nite group and show how representation theory solves the problem. The rst results about representation theory in characteristic p are also discussed.
