This much-needed text introduces new methods and technologies to apply today's principles to future practices of fashion marketing.

Principles of Marketing for a Digital Age SAGE

Student-led in its design and development, the book incorporates

digital marketing as central to what marketers do, and combines quality examples, assessment and online resources to support the teaching and learning of introductory marketing in a digital age. The author integrates digital and social media marketing throughout the chapters and through student involvement in the development of it, the text has been made to be approachable and to appeal to students, with infographics, numerous images, and an engaging writing style. It facilitates the “flipped” approach to classroom teaching and is supported by a number of features and activities in every chapter, encouraging students to undertake course reading, class participation and revision. It includes case studies from global companies such as Nutella, Google, L’Oreal, Netflix, Airbnb, BirchBox, Uber, FitBit, Visit California and Coca-Cola. It also takes a social view of marketing, featuring cases tied to the UN’s PRME initiative to aid students in becoming sustainably-minded individuals. The book is complemented by online instructor resources, including chapter-specific PowerPoint slides, an instructor manual, flipped classroom activities, as well as open access multiple choice questions (with solutions), videos, case studies, weblinks, a glossary and SAGE journal articles for students. Principles of marketing

ESIC Editorial

Marketing reversed prior business logic 50 years ago and said «the

customer is king», and the companies began to recognize that it was not just the product that was the most important aspect of their business. Companies recognized that consumers had a myriad of choices of product offerings and marketing was responsible to ensure that the company’s products had the benefits and attributes that customers wanted and were willing to pay for. Today, considering the technology development, which influences every function of the company, the focus of the successful marketing oriented companies has changed from «the customer is king» to «the customer is a dictator!!!». However, and despite the new trends in marketing, like any social science, marketing has basic principles, and these principles need to be considered when making any type of marketing decisions. So, the major step of a student of marketing, whether it is a young university student or an experienced business executive, is to understand the principles of marketing, and reading the present book will be the first step in accomplishing this task. This book describes these basic principles of marketing, and while the authors recognize that each decision may be slightly different from any previous decision, the rules or principles remain the same. The present book presents these basic marketing principles and tries to capture the essence of practical and modern marketing today. Therefore, the purpose of Principles of Marketing is to introduce readers to the fascinating world of marketing today, in an easy, enjoyable and practical way, offering an attractive text from which to learn about and teach marketing.
