Markowitz portfolio selection Modern portfolio theory (MPT) is a method for constructing a portfolio of securities. It was introduced by Harry Markowitz in the early 1950s. Markowitz's portfolio selection approach allows investors to construct a portfolio that gives investors the best risk/return trade-off available.

Markowitz portfolio selection - Breaking Down Finance

Harry M. Markowitz is credited with introducing new concepts of risk measurement and their application to the selection of portfolios. He started with the idea of risk aversion of average investors and their desire to maximise the expected return with the least risk.

Markowitz Theory of Portfolio Management | Financial Economics

In finance, the Markowitz model - put forward by Harry Markowitz in 1952 - is a portfolio optimization model; it assists in the selection of the most efficient portfolio by analyzing various possible portfolios of the given securities. Here, by choosing securities that do not 'move' exactly together, the HM model shows investors how to reduce their risk.

Markowitz model - Wikipedia

There's no such thing as the perfect investment, but crafting a strategy that offers high returns and relatively low risk is priority for modern investors. While this hallmark seems rather straightforward today, this strategy actually didn't exist until the latter half of the 20th century. In 1952, an economist named Harry Markowitz wrote his dissertation on "Portfolio Selection", a paper that contained theories which transformed the landscape of portfolio management—a paper which ...
