Forklift Test Questions and Answers 2020

What this Handbook is About. this handbook is about the skills and knowledge required to safely operate a forklift. the handbook is for either a light forklift with an empty weight of not more than 7.5 tonnes, or a heavy forklift with an empty weight is of more than 7.5 tonnes. the training course for both types of forklifts is the same. the licence issued will depend on the forklift used for the licence tests at the completion of the course.

Forklift Operator’s Handbook A Guide to Safe Operation

It’s one thing to do something in theory, and another to do it in practice. Before you can master any trade, it’s essential that you first understand the theories that lie behind it. This principle holds true for any activity, and operating a forklift is no different. An important part of becoming a certified forklift operator is the forklift theory test which verifies whether you understand everything you need to know in order to properly, safely, and effectively operate a forklift.
