Printing From A Stone The

The printing is from a stone (lithographic limestone) or a metal plate with a smooth surface. It was invented in 1796 by German author and actor Alois Senefelder as a cheap method of publishing theatrical works. Lithography can be used to print text or artwork onto paper or other suitable material.

Lithography - Wikipedia

Printing the stone When taking the first proofs from the stone, it is important to remember that the image will not print to its full potential until at least the 10th print – this is because the subtleties of the drawing will begin to show up after multiple inkings, so only after the stone has been thoroughly proofed is it possible to get a true idea of how the image will print.
