A data-flow is depicted on the diagram as a directed line drawn between the source and recipient of the data-flow, with the arrow depicting the direction of flow. Figure 6.3. Notation for a data-flow The directed line is labelled with the data-flow name, which briefly describes the information contained in the flow.

Chapter 6. Data-Flow Diagrams

A data flow diagram (DFD) maps out the flow of information for any process or system. It uses defined symbols like rectangles, circles and arrows, plus short text labels, to show data inputs, outputs, storage points and the routes between each destination.

What is a Data Flow Diagram | Lucidchart

A data flow diagram shows the way information flows through a process or system. It includes data inputs and outputs, data stores, and the various subprocesses the data moves through. DFDs are built using standardized symbols and notation to describe various entities and their relationships.

Data Flow Diagram Symbols, Types, and Tips | Lucidchart

A data-flow diagram is a way of representing a flow of data through a process or a system. The DFD also provides information about the outputs and inputs of each entity and the process itself. A data-flow diagram has no control flow, there are no decision rules and no loops. Specific operations based on the data can be represented by a flowchart. There are several notations for displaying data-flow diagrams. The notation presented above was described in 1979 by Tom DeMarco as part of Structured
