Phenomenological Psychology: Theory, Research and Method ...

Edmund Husserl (1859–1938), a philosopher, established the discipline of phenomenology. In Husserl's approach to phenomenology, now labelled descriptive phenomenology, experiences are described and researcher perceptions are set aside or 'bracketed' in order to enter into the life world of the research participant without any presuppositions. 1 Experience is recognised to involve perception, thought, memory, imagination and emotion, each involving

‘intentionality’, as the

Phenomenology in business research focuses on experiences, events and occurrences with disregard or minimum regard for the external and physical reality. Phenomenology, also known as non-positivism, is a variation of interpretivism, along with other variations such as hermeneutics, symbolic interactionism and others. This branch of philosophy “describes the philosophical approach that what is

directly perceived and felt is considered more reliable than explanations or interpretations in ...

Phenomenology - Research Methodology

Phenomenological Research Methods. In this volume, Clark Moustakas clearly discusses the theoretical underpinnings of phenomenology, based on the work of Husserl and others, and takes the reader step-by-step through the process of conducting a phenomenological study. His concise guide provides numerous examples of successful phenomenological studies from a variety of fields including therapy, health care, victimology,

psychology and gender studies.
