Information And Self Organization A Macroscopic Approach ...

Self-organization, also called spontaneous order, is a process where some form of overall order arises from local interactions between parts of an initially disordered system. The process can be spontaneous when sufficient energy is available, not needing control by any external agent. It is often triggered by seemingly random fluctuations, amplified by positive feedback. The resulting organization is wholly decentralized, distributed over all the components of the system. As such, the organizat

Self-organization - Wikipedia

the compression of information. This is a distinguishing feature of self-organization. By establishing a connection between the information compressed at a macroscopic level and an external observer, a new semantic level is reached [8, p. 27]. A new type of information, the information that refers to
