Error Correction Coding: Mathematical Methods and ...

Error coding is a method of providing reliable digital data transmission and storage when the communication medium used has an unacceptable bit error rate (BER) and a low signal-to-noise ratio (SNR). Error coding is used in many digital applications like computer memory, magnetic and optical data storage media, satellite and deep space communications, network communications, and cellular telephone networks.

Topic: Coding for Error Detection and Correction

Error Correction Coding: Mathematical Methods and Algorithms provides a comprehensive introduction to both the theoretical and practical aspects of error correction coding, with a presentation suitable for a wide variety of audiences, including graduate students in electrical engineering, mathematics, or computer science. The pedagogy is arranged so that the mathematical concepts are presented incrementally, fol-lowed immediately by applications to coding.
