This book attempts to understand the human condition of love. It looks at the concept of love from two general standpoints: love as an individual internal experience, and love as a reflection of human history. The book explores what motivates us to love, what constitutes love, how is love connected with sexuality and how has love evolved.

If the point of Armstrong's book is a bit dog-eared and insubstantial, what makes up the bulk of Conditions of Love are the theories of love he

picks up, considers, then puts down along the way. Most interesting is Armstrong's consideration of evolutionary psychology's take on love, which says that the capacity for strong emotional attachment is part of the genetic endowment we received from our ancestors.

Review: Conditions of Love: The Philosophy ...

In marrying the carnal and the cardinal with a poet's sensibility and a philosopher's rigour, much as Alain de Botton did in *Essays in Love*, John Armstrong guides us towards a more mature, imaginative future, less rosy, but perhaps more rooted. Love may, ultimately, perhaps definingly, prove ineffable, but *Conditions of Love* charges us with the power to facilitate its bloom, and the inspiration to achieve it.
