I bought a Talon 13hp
generator 2 years ago.
It has been working
non-stop for the last
couple of days due to a

substation outage in
our area. The low oil
feature has really
helped me several
times already. I just
wanted to say thank
you for the great
product. I will definitely
be recommending
Talon to friends and
family in future.

Have a Talon 4 stroke
which will not rev high
like mostly other
mowers. Is this

standard for a Talon or
is there adjustments,
etc required to make
engine rev higher.
Appears with current
revs would stall in a
medium to high grass.
Is it considered that at
low type revs mower is
capable of mowing
lawn without any
undue concern
