Peopled by larger-than-life heroes and villains, charged with towering questions of good and evil, Atlas Shrugged is Ayn Rand’s magnum opus: a philosophical revolution told in the form of an action thriller—nominated as one of America’s best-loved novels by PBS’s The Great American Read. Who is John Galt? When he says that he will stop the motor of the world, is he a destroyer or a liberator? Why does he have to fight his battles not against his enemies but against those who need him most? Why does he fight his hardest battle against the woman he loves? You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book. You will discover why a productive genius becomes a worthless playboy...why a great steel industrialist is working for his own destruction...why a composer gives up his career on the night of his triumph...why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill. Blood Type Diet

What to Eat & Avoid Right for Your Blood Type: Recipes as Per Your Blood Types A, B, O & AB Independently Published

The lack of correct nutrition has resulted in the development of several unique approaches for healthy eating. Amongst them, the Blood Type Diet has emerged as an intriguing nutritional plan. Our blood type may determine which illnesses and diseases we may develop. It is an interesting approach, however, no research has been conducted, and no studies have been conducted that show blood type may be a predictor for development of certain kinds of diseases. Considering what was said before, the basic principle of this diet is, not everybody should follow the same diet-our blood type and race will determine the tolerance to what we should and shouldn't eat. Based on this principle, there are sixteen food groups that are neutral, highly beneficial, or detrimental. Each blood type is supposed to eat in the following way: Type A: Called cultivator, or agrarian. Type A people should eat a plant-based diet that is totally free of toxic red meat. This very much resembles a vegetarian diet. Type B: Called nomad. Type B people can eat most meats (except pork, duck, goose, hens and chicken) and plants, and they can eat some dairy. However, they must avoid corn, wheat, tomatoes, lentils, all shellfish, eel, snail, ice cream, American cheese and blue cheese. Type AB: Called enigma. It is a combination between Types A and B. Foods to eat include tofu, dairy, seafood, grains, and beans. They have to avoid kidney beans, beef, corn, and chicken. Type O: Called hunter. This high-protein diet is based mainly on fish, meat, poultry, and certain vegetables and fruits, but it limits legumes, grains, and dairy. This resembles the paleo diet.
