Application Engine State Record

State records are used in Application Engines as a storage location for data that needs to be passed across actions. An Application Engine can have more than one state records (a maximum of 200) associated with it out of which only one can be marked as a default state record.

PeopleSoft State Record - PSoftSearch

A Application Engine state record must have a process instance defined as the first field and the only key field, and the state record name must end with _AET. Not all the database columns referenced in your program must be in the state record, just the columns that must be selected into memory so those values can be referenced in a subsequent program action.

Using State Records - Oracle

State records are used in Application Engine programs to keep track of useful information through the life of a program. PeopleSoft uses the concept of a record (table) to store this information. The scope of data in a state record is global to an application engine program (and other programs that share the state record). The naming convention of state records is to end with the suffix _AET. They can either be a derived/work record or a SQL table.

State Records | PeopleSoft Wiki

A state record is a PeopleSoft record that must be created and maintained by the Application Engine developer. This record defines the fields a program uses to pass values from one action to another. Think of the fields of the Application Engine state record as the working storage for your Application Engine program.

Understanding PeopleSoft Application Engine

State Record: 1. The record that ends with '_AET' is identified as State Record. 2. Used in Application Engine program. 3. As name itself says 'state' meaning we get to know the state of data (snapshot) that is passed through the program.

Basics in PeopleSoft: Application Engine: State Record

A state record is a PeopleSoft record object that contains one or fields used by the program to pass values between steps and actions. Essentially it is a work record for your application to store common variables that can then be used throughout the program. A state record can either be a database table or a PeopleSoft work record.

Application Engine | PeopleSoft Wiki

You can think of the state record as the record of assigned variables that exists for an single instance of an application engine execution process. Each execution will have its own record and can be unique to that process run. A state record is passed variables from the process request

record commonly called the Run Control.

Doug's Developer Toolbox: The PeopleSoft State Records and ...

We use a State Record to keep data accessible across Actions. We can have many State Records for an App Engine. Do you know if we can have an App Engine that does not have a State Record? « Set Processing in App Engine » App Engine without Main Section

App Engine without State Record? | PeopleSoft Interview ...

Within an Application Engine program we populate a state record (AET table) with values. The first time we use these values (i.e. retrieve them using %Bind (<fieldname>)) the values are retrieved successfully, however when we attempt to use the values a second time they are empty/blank.

State Records and Missing Data | The PeopleSoft Tipster Blog

Application Engine Interactive Debugger – First click on the trace tab and turn off the statement timings. Select Profile -> Edit Profile-> Process Scheduler Tab -> Application section Select Debug check box. (You can dynamically modify the state record run application engine step by step People Code Debugger for the Application Engine.)

My Basic Knowledge: Application Engine Concepts

- The Application Engine State Record is the method by which you allocate variables for your Application Engine program.
- It is also the method by which Section, Steps, and Actions pass values to subsequent program steps.
- You can think of State Records in Application Engine as global variables without scope limiting rules.

Application engine - SlideShare

Application Engines. PSAEAPPLDEFN: Table that stores Application Engine program definitions. PSAEAPPLSTATE: Stores application engine STATE records and a flag to indicate if the record is the default STATE record. PSAESECTDEFN: Application engine section information and also stores last user id to update a specific section.

PeopleSoft PeopleTools Meta-Tables | CompShack.com

Once you have the state record saved, you need to connect it to the App Engine program. To do so, open the App Engine properties and go to the State Record tab. Enter the name of the state record in the search box, click the “Get List” button, select the record in the “Record List”, and finally click the “Add” button.

Basic Steps to Create an Application Engine in PeopleSoft ...

- 1) Should be either Derived work record Or SQL Table.
- 2) Name of the record must end with _AET; this is how the system identifies the record as a state record.
- 3) PROCESS_INSTANCE must be a key.
- 4) Any data types except character or numeric must not be required fields.

PeopleSoft: Application Engine Interview Question

%SelectInit or %Select %Select () and %SelectInit () both are used to push values into a state record in an application engine program. Both of them works in the same way, when the select statement is retrieving any row of data, but when the "select statement associated is not retrieving any row of data " they works in a different manner.

Peoplesoft Beginner: %SelectInit or %Select

A state record is a PeopleSoft record that must be created and maintained by the Application Engine developer. Working storage for your Application Engine program. Used to pass values from one action to another. (Place to store variables)<!-- [endif]-->

PeopleSoft Application Engine - Bipin's PeopleSoft Experience

In application engine for example, STAT records that are of type derived/work have their field values reinitialized after each commit. So, prior to the commit, your values are there, and then after the commit they are all gone! Give back to the community and help it grow! * Help with unanswered forum questions and issues
