Update in sepsis guidelines: what is really new?

Purpose of review: Sepsis-3 guidelines have implications in a deeper understanding of the biopathology of the disease. Further, the review focuses on timely topics and new literature on fluid resuscitation, the value of steroids in sepsis, and new therapeutic options such as angiotensin II, vitamin C, and thiamine as well as the emerging role of procalcitonin (PCT) in managing antibiotics.

Sepsis - What's new in 2019?

However, the Surviving Sepsis Campaign bundles have already incorporated the new Sepsis-3 definitions into their recommendations for sepsis screening and management. 14 Recommendations include initial screening for suspected or confirmed infection, screening for organ dysfunction and management of sepsis, and identification and management of initial hypotension. The qSOFA may be an additional tool to help identify patients who are at increased risk.
