Embedded Case Study Methods

An embedded case study is a case study containing more than one sub-unit of analysis (Yin, 2003). Similar to a case study, an embedded case study methodology provides a means of integrating quantitative and qualitative methods into a single research study (Scholz & Tietje, 2002; Yin 2003). However, the identification of sub-units allows for a more detailed level of inquiry.

Embedded case study - Wikipedia

Using their own Zurich North case study to explain the proper use of case study methods, they demonstrate how eleven different techniques -- including integrated risk assessment, multi-attribute utility theory, scenario analysis, future workshops, and a kind of mediation called Area Development Negotiation -- ought to be used to develop collaborative solutions.

Amazon.com: Embedded Case Study Methods: Integrating ...

In an embedded case study, the starting and end point is the comprehension of the case as a whole in its real-world context. However, in the course of analysis the case will be faceted either by different perspectives of inquiry or by several sub-units. The book presents different methodological approaches to organize this faceting process.

Types of Case Studies - SAGE Research Methods

Combining the case method with other methods. Some researchers combine case studies with other methods, such as a survey: for example, you could conduct a survey of several local councils, and provide a case study of one council. This type of approach has the benefit of combining qualitative and quantitative research.

How to... undertake case study research | Emerald Publishing

A nested case-control study is a variation of a case-control study in which cases and controls are drawn from the population in a fully enumerated cohort. Usually, the exposure of interest is only measured among the cases and the selected controls. Thus the nested case-control study is more efficient than the full cohort design. The nested case-control study can be analyzed using methods for missing covariates. The NCC design is often used when the exposure of interest is difficult ...

Nested case-control study - Wikipedia

Methods: As part of a nested case-control study, 200 WTC Health Program (WTCHP) General Responder Cohort (GRC) members completed a newly-developed study questionnaire via telephone (with a trained interviewer) or online (self-administered). We assessed agreement between measures of tobacco and alcohol use in our questionnaire results and data collected previously during WTCHP-GRC monitoring ...
